

## Note

This is a multi-layer PDF. View it in the Adobe Acrobat Reader to see the layers and control their visibility.

For example, switch off all layers but (Text white (front)) and (Background cyan) to get white text on cyan. Print this on one side of the paper/card.

Then select (Text white (back)) and (Background (magenta)) and print it on the back of the same sheet of card.

The front and back images should hopefully line up accurately enough
